

PRESS RELEASE

Reimann GmbH presents new TRUMPF laser cutting system at ALUMINIUM 2024

Largest investment in the company's history: Reimann GmbH expands production capacity with state-of-the-art laser cutting system

Mönchengladbach, October 08, 2024 - Reimann GmbH is pleased to announce a significant expansion of its production capacities at ALUMINIUM 2024 in Düsseldorf: The investment in the state-of-the-art TRUMPF TruLaser 3040 fiber laser cutting system, which will be put into operation in December 2024. This system replaces the previous laser cutting system from 2012 and represents the company's largest investment in the future to date.

Focus on technological innovation and sustainability

The new laser cutting system with state-of-the-art fiber technology enables a significant reduction in CO₂ consumption and greatly accelerated production output. In addition, the system is equipped with a fully automatic storage system comprising 67 individual areas, each with a capacity of 5,000 kg, and offers the option of processing sheets in maxi format of 4,000 x 2,000 mm. Thanks to the fully automatic loading and unloading of the laser-cut parts, production is not only faster, but also more efficient and precise. In future, laser cuts can be carried out within a few hours, depending on material availability.

A step into the future

"With this investment, we are setting an important milestone for the future of our company and our customers," explains Jürgen Kreuzer, Managing Director of Reimann GmbH. "The TRUMPF laser cutting system will not only enable us to process larger volumes more efficiently, but will also support our sustainability goals by significantly reducing our energy consumption."

The plant is expected to be fully commissioned in December 2024, with production scheduled to start in January 2025. Reimann is also planning several training courses to optimally prepare the team for the new technologies.

Visit us at ALUMINIUM 2024 - Hall 6, Stand G19

Visitors to ALUMINIUM 2024 are cordially invited to visit us in Hall 6, Stand G19, to find out more about this new investment and other innovative solutions from Reimann. The trade fair offers the perfect opportunity to experience the benefits of our new technologies and learn more about our strategic approach to energy-efficient and future-oriented production.

PRESS RELEASE

About Reimann GmbH

Reimann GmbH is an industrial manufacturer and, with its high-quality products, has been an important supplier to the German and European mechanical and plant engineering industry for over 50 years. With the claim "excellence in industrial solutions", the company combines the claim to be a competent and reliable partner for customers and to offer innovative solutions.

Under the leadership of owner and managing director Jürgen Kreutzer, Reimann has developed from a steel construction company into an industrial manufacturer and specialist for the refurbishment of industrial furnaces in just under 10 years. The family business takes on complex industrial projects in the business areas of industrial furnaces, technical insulation, stainless steel production, boiler production, pipeline construction, steel construction and sheet metal processing for national and international customers. In addition to on-site maintenance and assembly work, prefabrication in the company's own production halls at its headquarters in Mönchengladbach is a core competence of Reimann GmbH.

Reimann GmbH's customers include well-known companies and groups such as Aluminium Norf GmbH, GE Grid GmbH, Constellium, TRIMET Aluminium SE, Novelis, Aluminium Duffel BV, Martinrea Honsel, Otto Fuchs, SMS Group, RWE, ThyssenKrupp and Mitsubishi Power Europe GmbH.
